

## Pneumatic 2" Angle Gouger

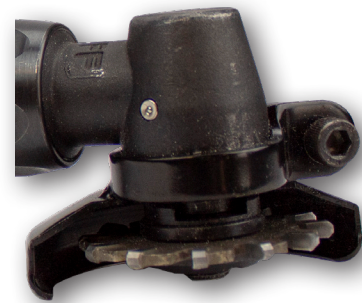

### "Back Gouging" Pneumatic Saw

The first industrial-grade and compliant tool design ensures fast and effective back-gouging for reducing porosity along aluminum seam lines.

For Production Use or Rework/Repair

5A-0514-2

- Reduce aluminum scrap and rework
- Greater accessibility to welds and cut lines
- Ease of use in tight quarters
- Eliminate unsafe use of fiber discs for gouging
- No fiber particle contamination
- No disc disintegration if tool binds
- Replaces large circular saws and electric grinders
